### NOTICE OF AVAILABILITY TOTAL MAXIMUM DAILY LOAD (TMDL) FOR WATER AND POLLUTANT IN THE STATE OF SOUTH CAROLINA

Section 303(d)(1)(C) of the Clean Water Act (CWA), 33 U.S.C. §1313(d)(1)(C), and the U.S. Environmental Protection Agency's implementing regulation, 40 CFR §130.7(c)(1), require the establishment of Total Maximum Daily Loads (TMDLs) for waters identified by states as not meeting water quality standards under authority of §303(d)(1)(A) of the CWA. This TMDL is to be established at a level necessary to implement applicable water quality standards with seasonal variations and a margin of safety, accounting for lack of knowledge concerning the relationship between pollutant loading and water quality.

The waterbody impairment on South Carolina's 303(d) list that will be addressed by the TMDL is listed below. This impaired waterbody is located in the Catawba-Wateree Basin.

Waterbody Name	Station ID	§303(d) List Pollutant
Big Wateree Creek at U.S. 21	CW-072	Fecal Coliform Bacteria Turbidity
